

Agenda today

9:30 – 9:45 Check-in & Agenda

9:45 – 10:15 Input: Model integration

10:15 – 11 Working with your models

11 – 11:15 Presentation of findings

11:15-11:30 Break

11:30 – 12:00 Input: Storytelling tools

12:00 – 12:30 Open Questions

Storytelling in this module

- What are the most important findings that have an impact on achieving the goal? - Build a story around that.
- What kind of story are you telling?
Novelty/Continuity/Transition/?

 Situation
So there I was... (Time, place, single human protagonist)

 Trouble
I/We wanted... (Internal or external desire or goal)

 Action
And so... (A choice) And then...

 Result
Until finally...

 **But...** (Lack of resources, external forces, limiting beliefs...)

Optional: Do you have data to quantify it? (How much? How big? How fast? How good? Qualitative data?)

Emotional data / somatic memory
I/we Felt...

Mad
frustrated annoyed
defensive
disgusted outraged
offended

Sad
depressed
disappointed
regretful dismayed
disillusioned pessimistic
mournful

Happy
glad overjoyed
relieved
elated
pleased excited
grateful thrilled
content amused
triumphant

Afraid
anxious vulnerable
stressed
nervous cautious
confused

Hurt
betrayed
shocked
stunned
aggrieved
abandoned

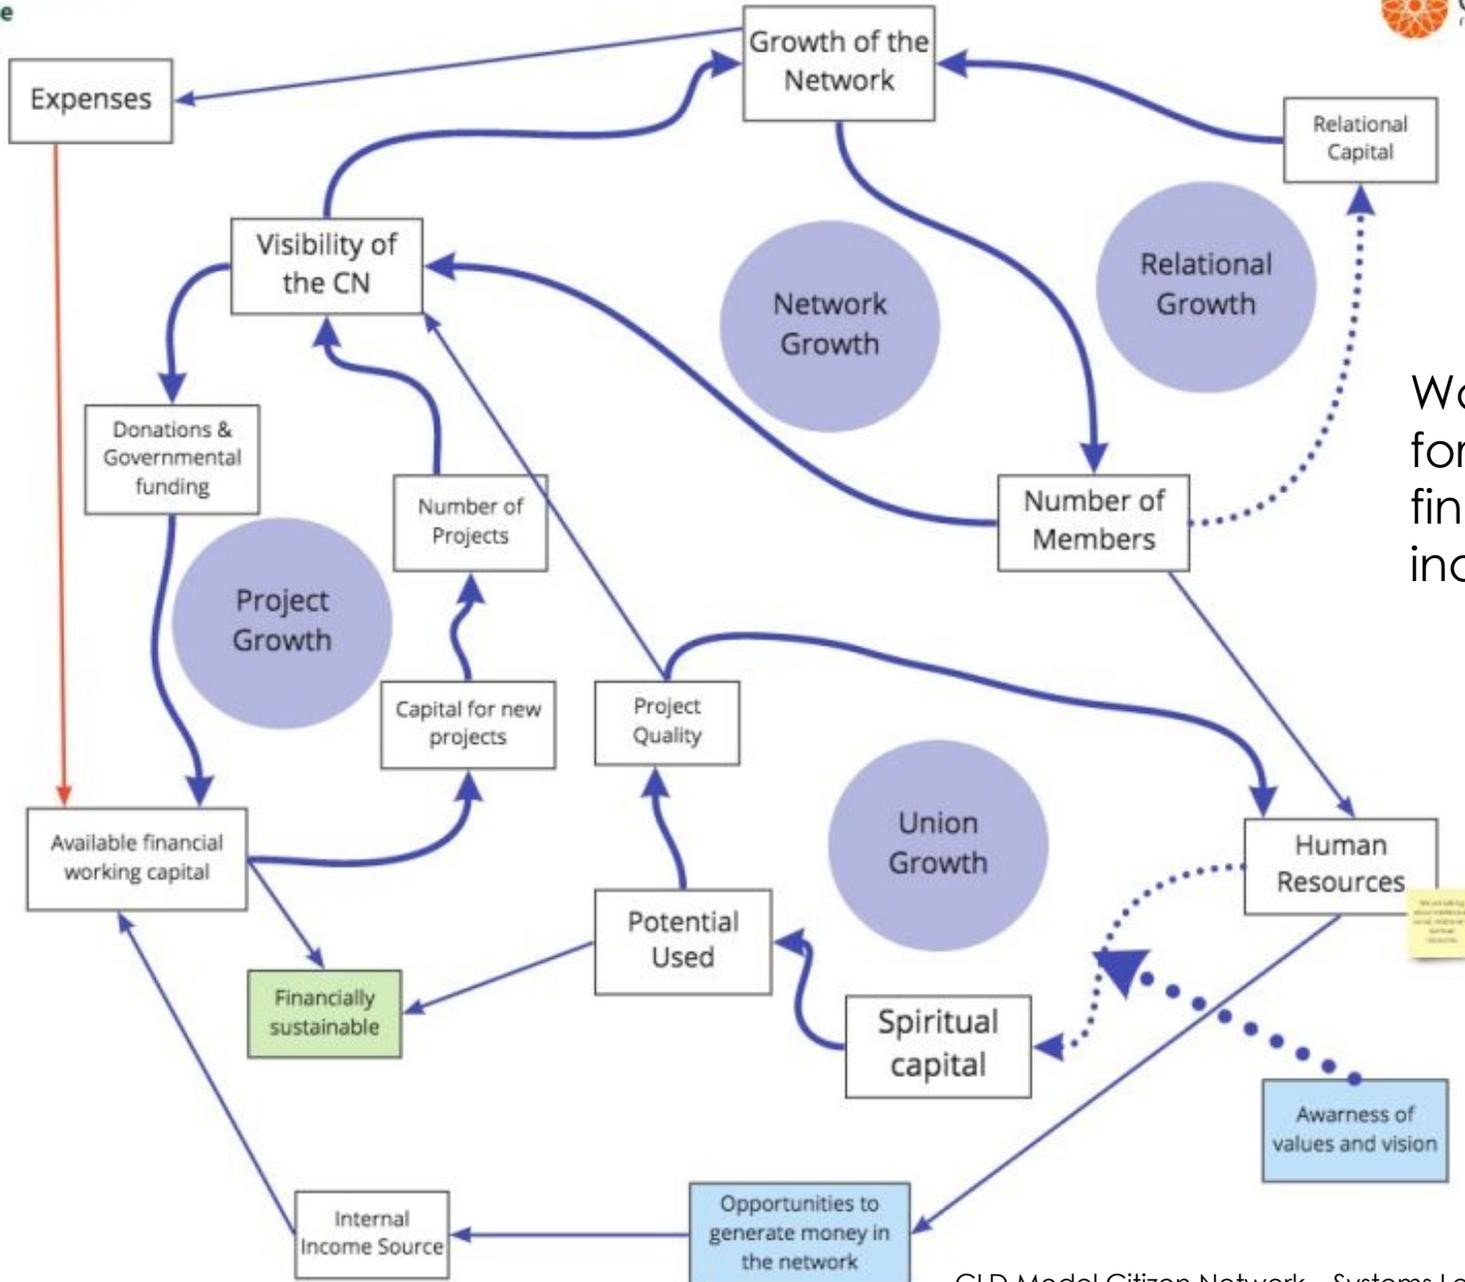

Insight / Connection:
And now we know... / And that's why...

Storytelling – David Hutchens

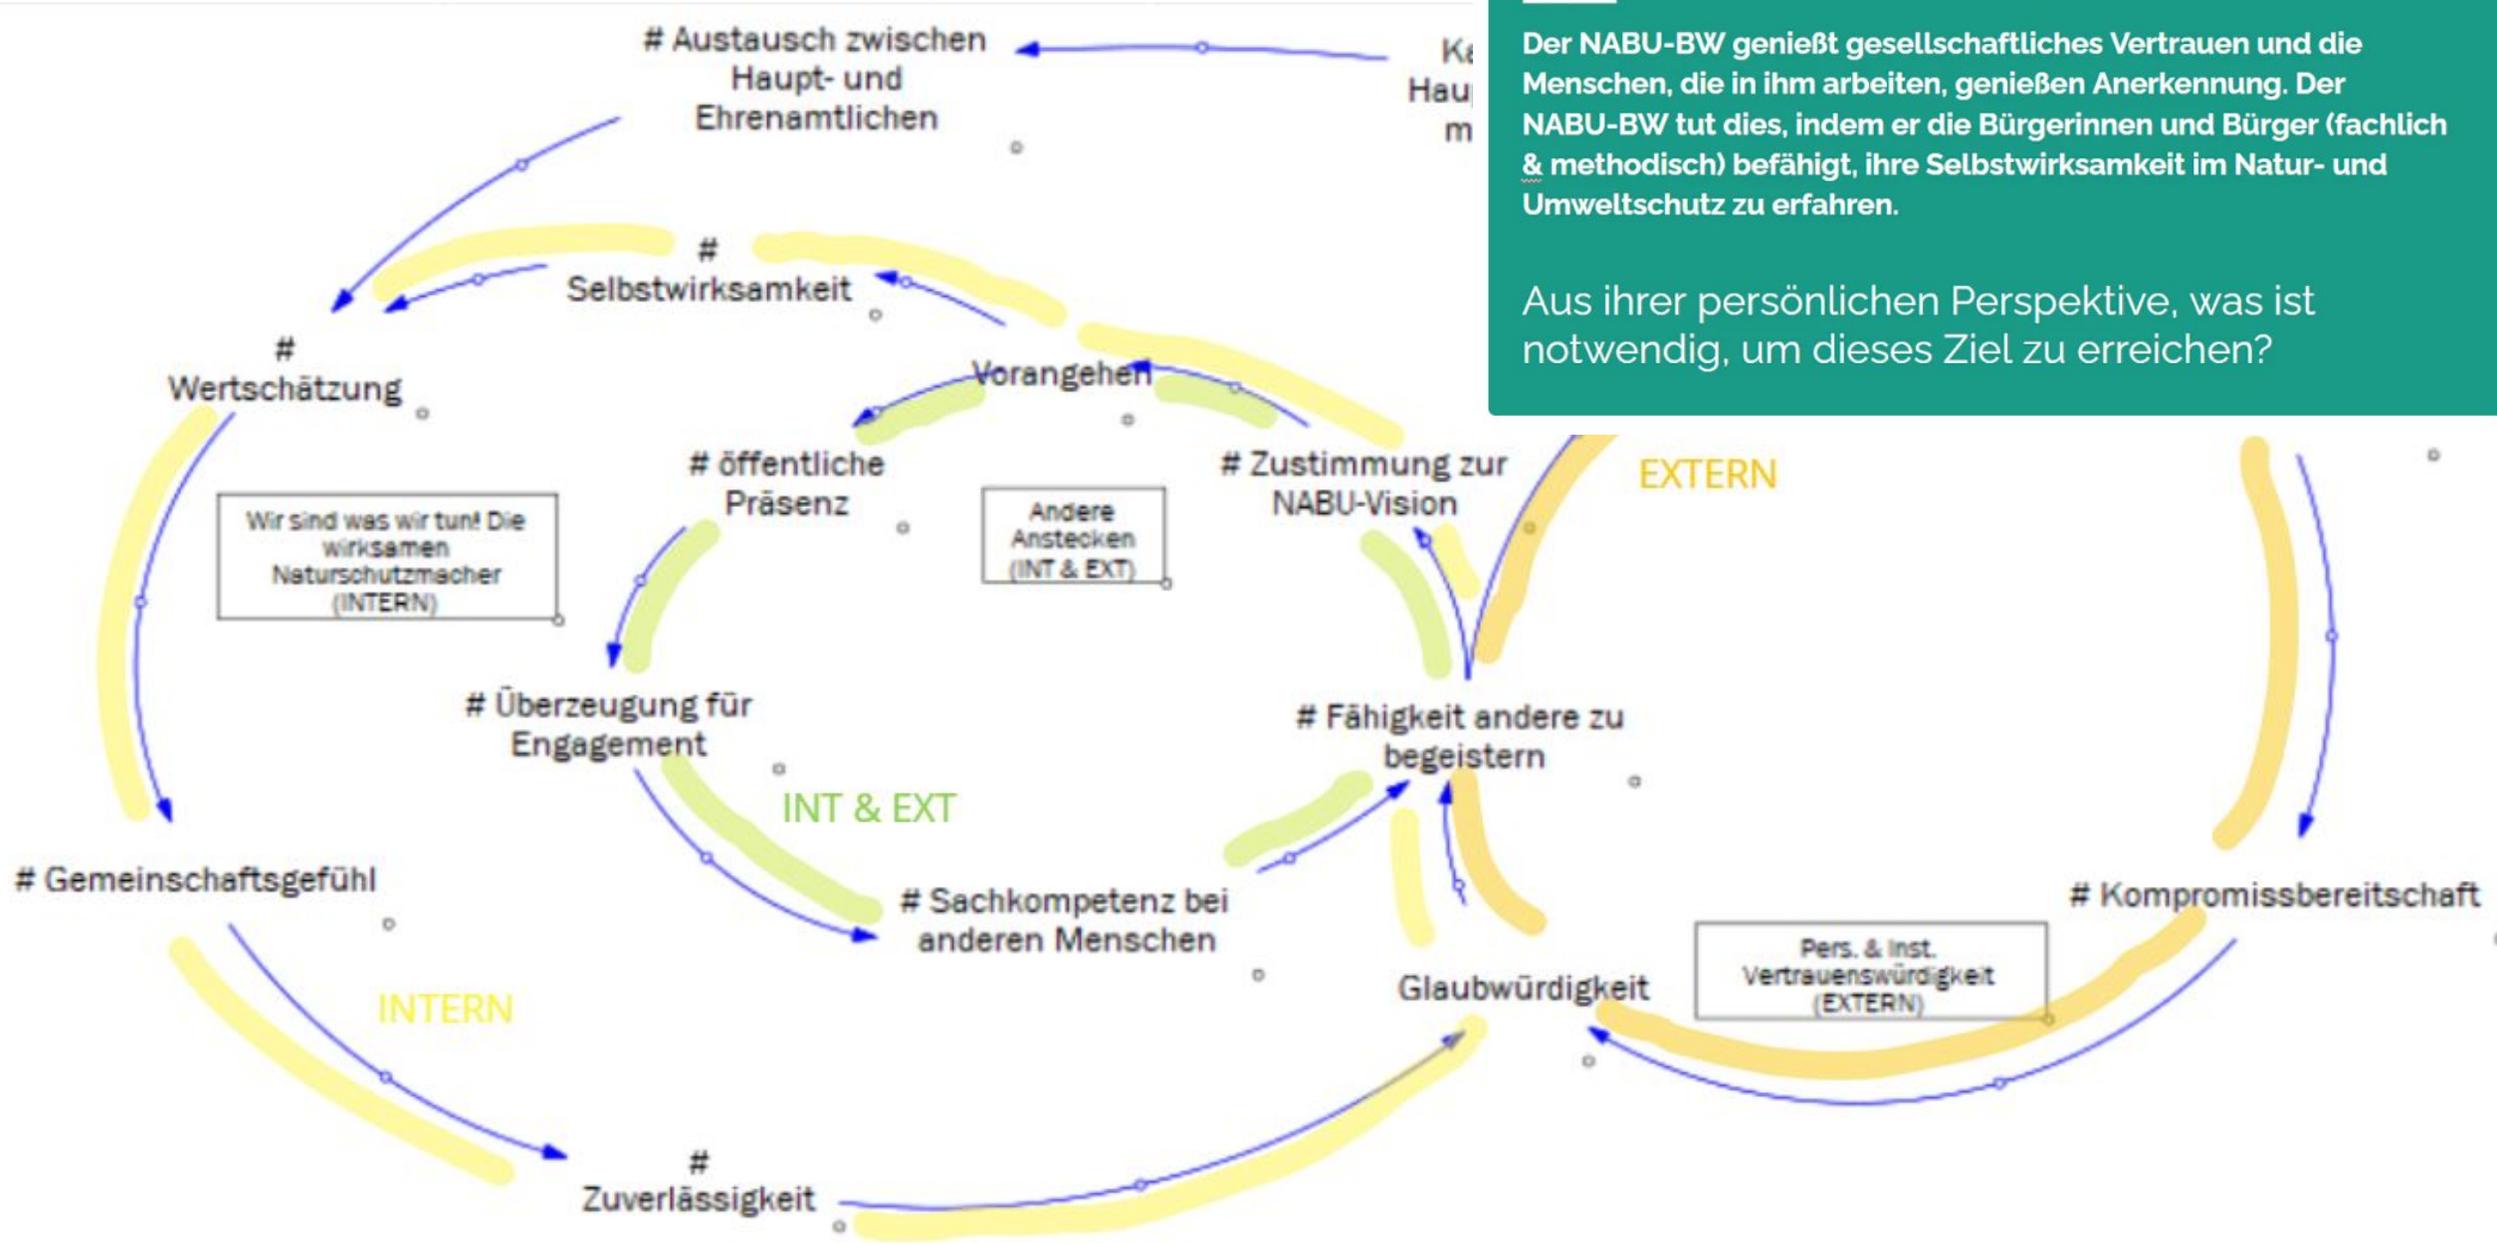

Naming the Loops

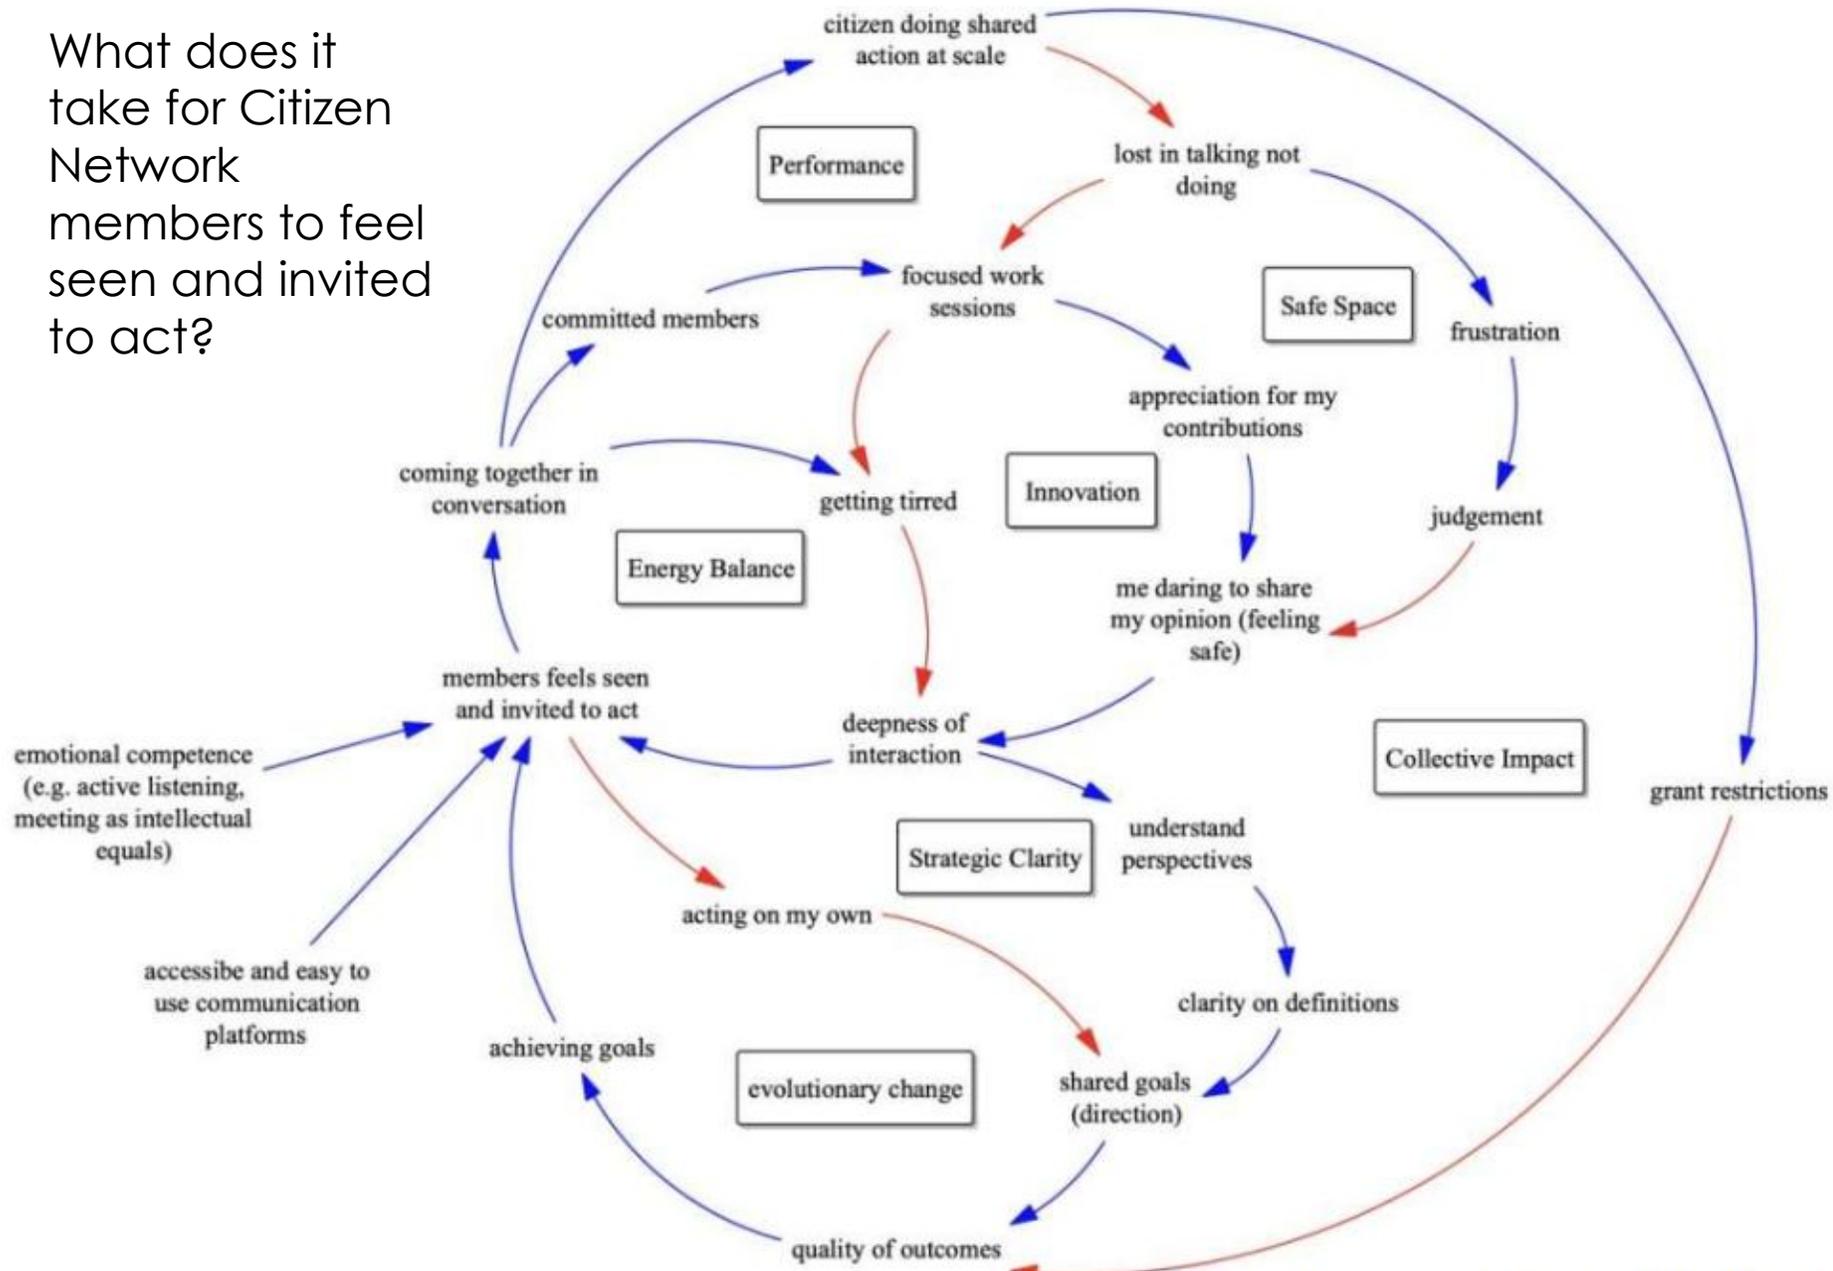

Was does it take
for CN to be more
financially
independent??

Der NABU-BW genießt gesellschaftliches Vertrauen und die Menschen, die in ihm arbeiten, genießen Anerkennung. Der NABU-BW tut dies, indem er die Bürgerinnen und Bürger (fachlich & methodisch) befähigt, ihre Selbstwirksamkeit im Natur- und Umweltschutz zu erfahren.

Aus ihrer persönlichen Perspektive, was ist notwendig, um dieses Ziel zu erreichen?

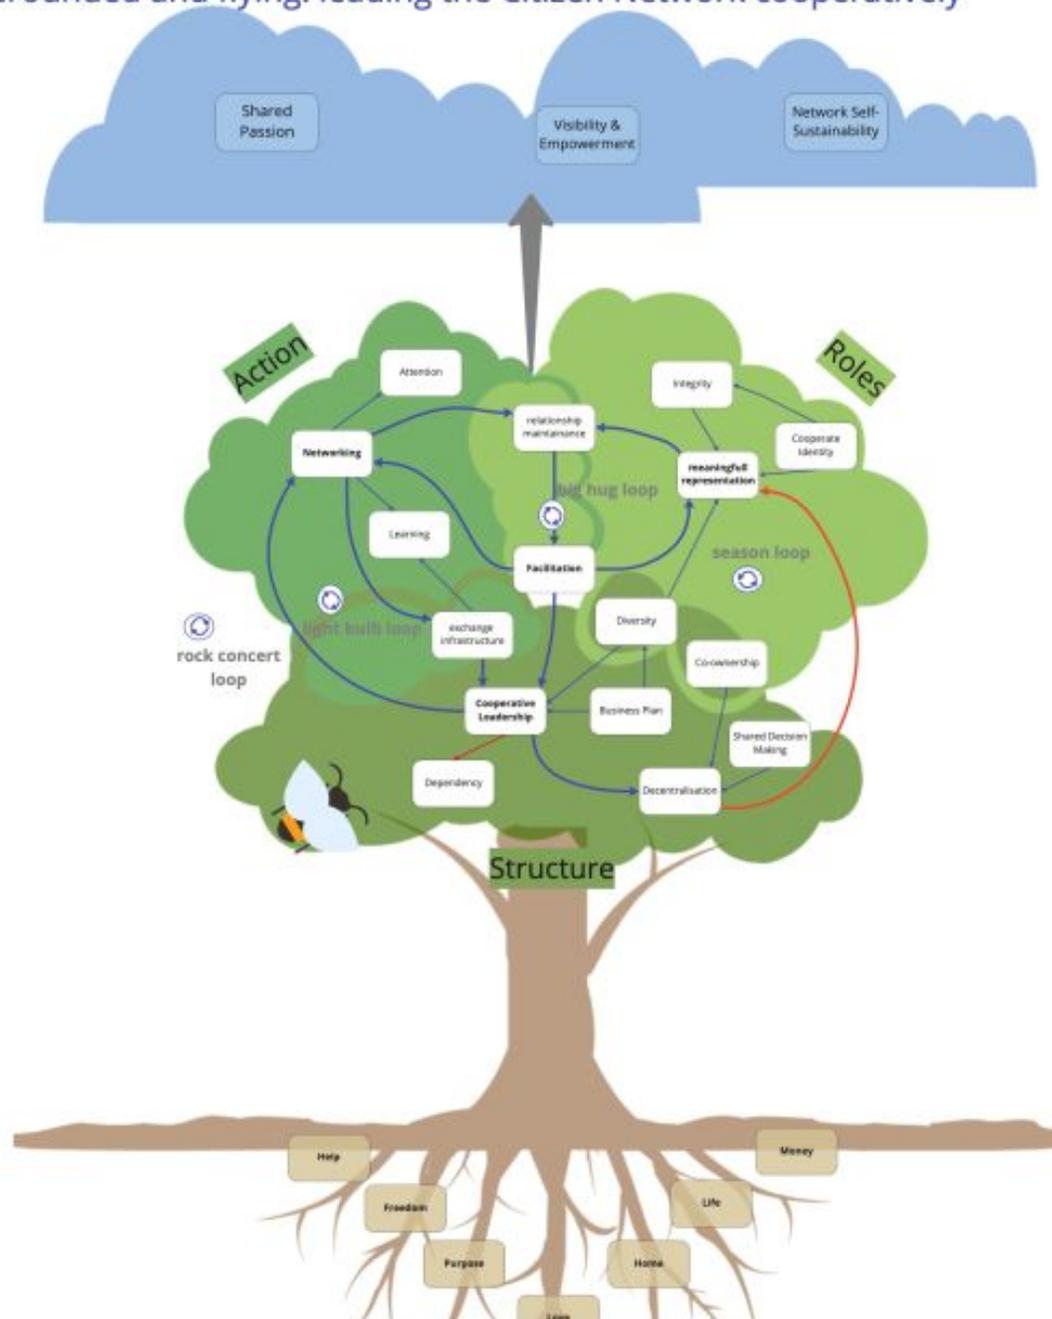

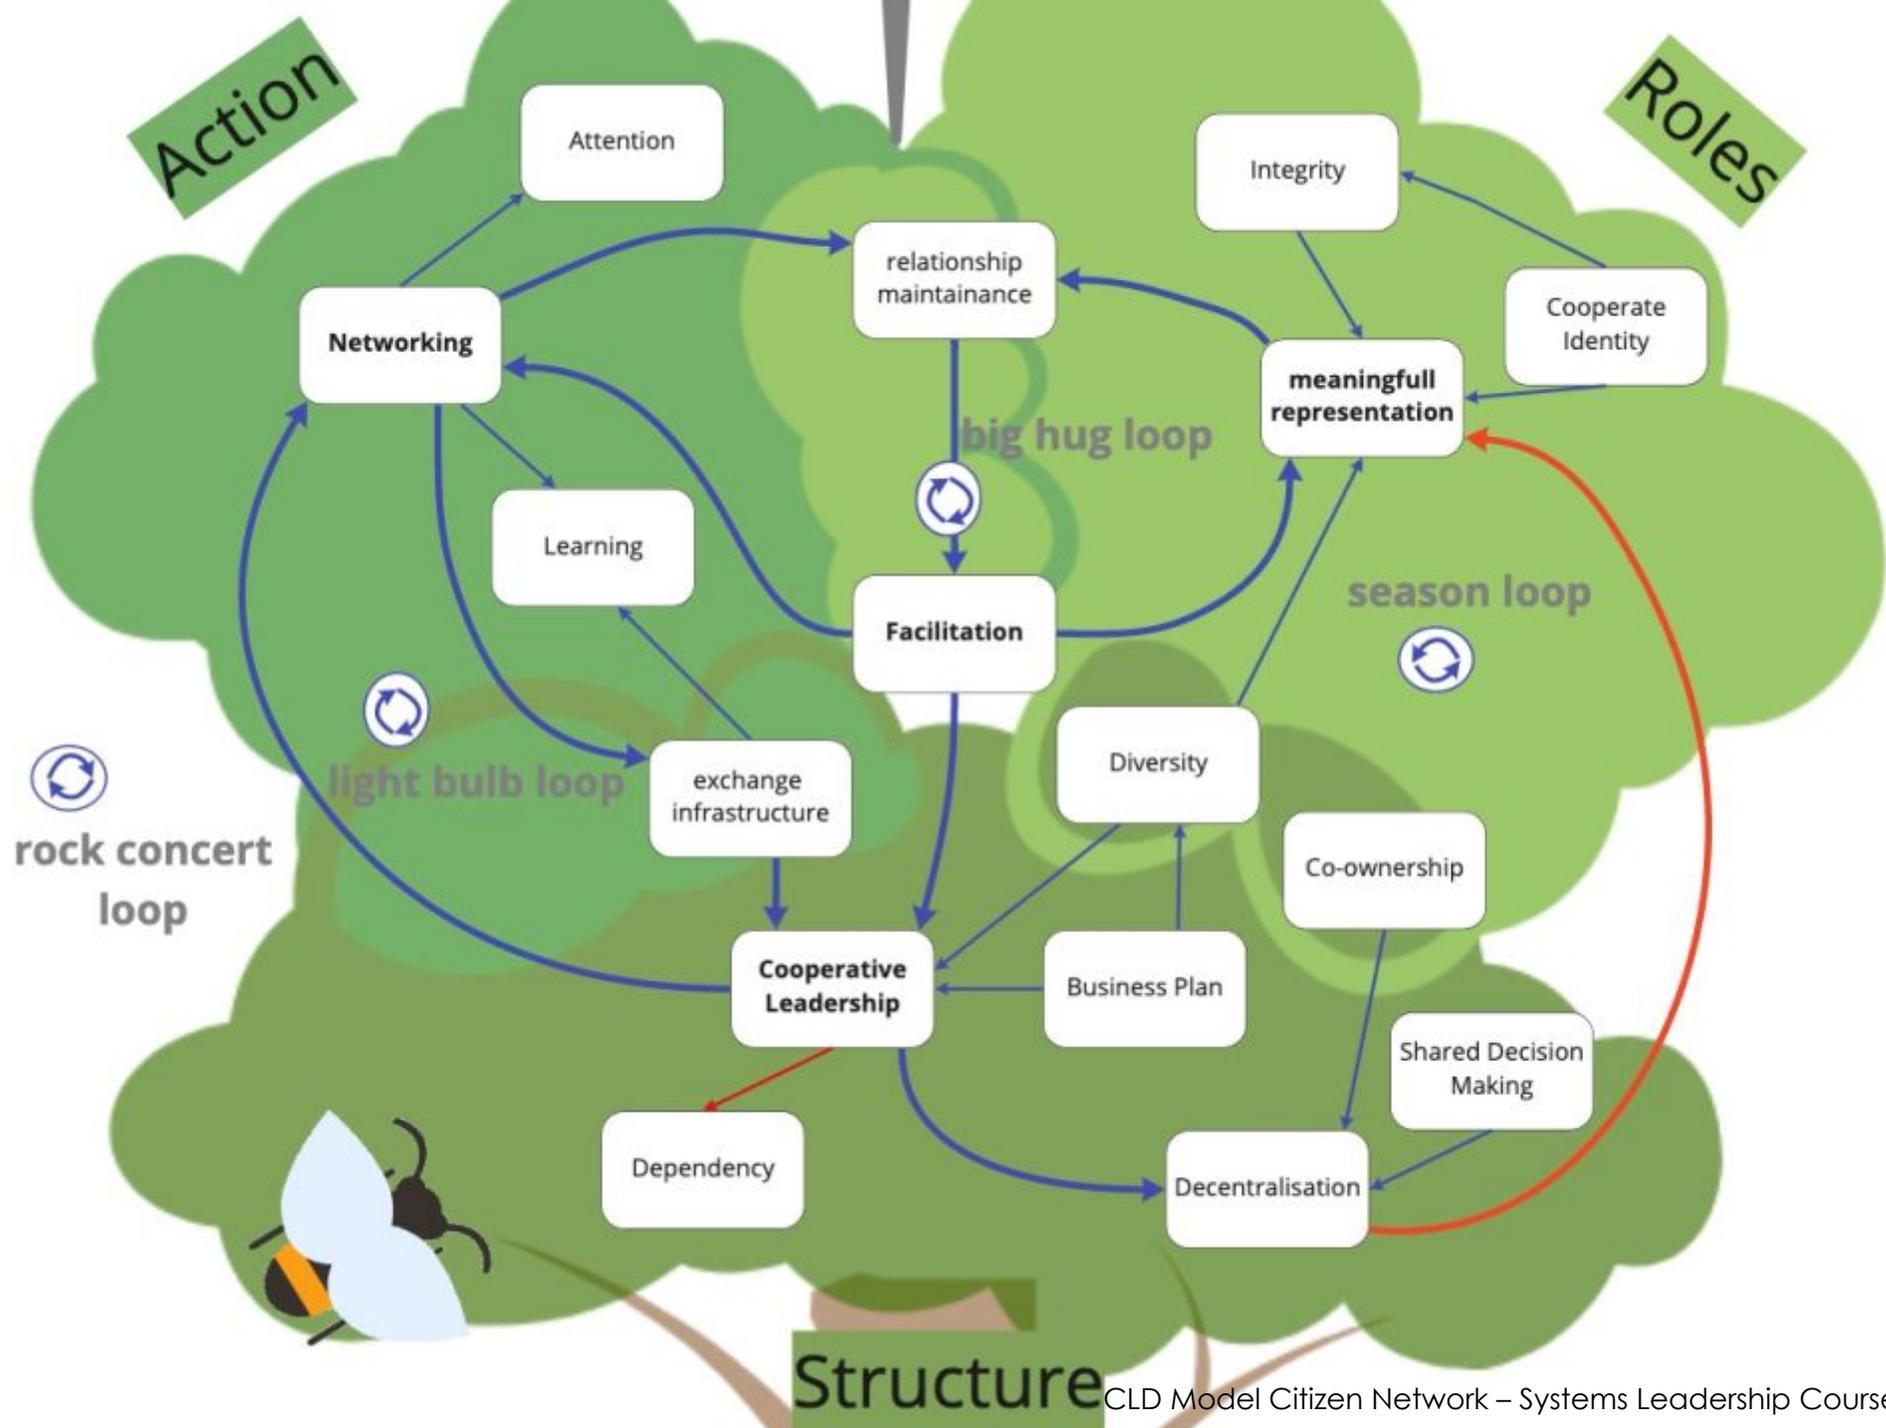

What does it take for Citizen Network members to feel seen and invited to act?

Working with different depth on vensim

(Hide/Un-hide-Tool)

For your presentation on Friday

- Be aware of your goal:
 - Systems Leadership support for Wikimedia
 - Increase Systems Thinking Capacities
 - Increase Knowledge about the System
 - Trust and Collaboration
 - Etc.
- Be courageous. Invite Dialogue & Discussion
- Think about what happens after the presentation – what can you do to give them the best tools to further work with your findings?
- You don't always have to go all the way through the model, but rather show certain dynamics (e.g. feedback loops)
- Strategies should be suggested - explain using the model and be clear about knowledge gaps
- 40 min presentation + 45 min discussion (have questions prepared, lead the discussion)
