BIOM M.Sc. Thesis Colloquium

Day 1: March 18, 2025

Master's thesis colloquium on April 23, 2025

- 10 minutes of presentation
- 15 minutes of discussion

Master's thesis colloquium presentation content

1. Working title with names of potential supervisors
2. Background of your topic – short literature review
3. Aim and objectives
4. Indicative methodology
5. Rough schedule

Deadlines for thesis registration and submission

- The registration of final theses must take place at the latest by the end of the following semester in which the last examination was taken.
- *If this master's thesis colloquium is your last examination (SoSe 2025) then your last day for registration of your thesis would be in WiSe 2025/26 or February 20, 2026.*

Deadlines for thesis registration and submission

- The processing period of master's theses is up to 6 months. After submission, your examiners should submit their review of your thesis maximum 6 weeks after.
- *Example: if you register on February 20, 2026 then you would have to hand in your master's thesis six months after on August 20, 2026. You should be able to defend anytime from six weeks after handing in your thesis on October 02, 2026.*

Master's thesis colloquium on April 23, 2025 (Wednesday)

- Starting at 10:00 CEST online via Zoom (presentation sequence on voluntary basis)
- Please do not forget to self-register for your master's thesis colloquium as an examination on EMMA (latest 24 hours before the examination, i.e., April 22, 2025)
- Good luck with your preparations!
